National Health Ethics Week

Title: Finding the Juice: enhancing purpose and vitality in daily life and work

Marybeth Leis Druery, Community Life Facilitator with Student Open Circles

The work of healthcare can be taxing emotionally, psychologically and physically. Deepening our connection to the meaning and purpose of our work can enhance resilience and the quality of our worklife. This experiential and reflective presentation invites participants to explore our values and the meaning of our work, and how these connect with what we *really* want. We will discover what it looks like to create space for vitality and presence at work. Through guided meditation, art reflections, and writing exercises participants will be invited to grow their ethical foundation, mine daily life for meaning and renew our sense of purpose as healthcare providers.

Monday April 3, 2017

3:30 – 5:00 pm
